

Mouse IgG2b Isotype Control BG Violet 450

Catalogue Number : 43922-40

RUO: For Research Use Only. Not for use in diagnostic procedures.

Product Information

Clone: MPC-11

Format/Conjugate: BG Violet 450

Concentration: 0.2 mg/mL

Reactivity: Mouse

Laser: Violet (405nm)

Peak Emission: nm

Peak Excitation: nm

Filter:

Brightness (1=dim,5=brightest):

Isotype: MouselgG2b

Formulation: Phosphate-buffered aqueous solution, ≤0.09% Sodium azide, may contain carrier protein/stabilizer, pH7.2.

Storage: Product should be kept at 2-8°C and protected from prolonged exposure to light.

Applications: FC

Description

The MPC-11 monoclonal antibody is expressed by a cell line adapted from the Merwin Plasmacytoma-11, and has unknown specificity. The MPC-11 line was obtained by intraperitoneal implantation into a BALB/c Mouse of a Millipore diffusion chamber and is used as an Isotype Control for MouselgG2b antibodies.

BG Violet 450 conjugate is an alternative to the Pacific Blue, eFluor 450, or BD Horizon V450 dyes. It is excited by the violet (405 nm) laser, with a peak emission of 450nm.

Preparation & Storage

The product should be stored undiluted at 4°C and should be protected from prolonged exposure to light. Do not freeze.

The monoclonal antibody was purified utilizing affinity chromatography and unreacted dye was removed from the product.

Application Notes

The antibody has been analyzed for quality through the flow cytometric analysis of the relevant cell type. The antibody can be used at less than or equal to 5 µL per test. A test is the amount of antibody required to stain a cell sample in the final volume of 100 µL.
